Memo to File:

RE: Utah International
Iron Springs Mine
ACT/021/001

On April 24, 1980, Tom Suchoski of the Division met with York F. Jones, Stephen Davis, and Krishnamurthi of Utah International; and Kent Gray, Kent Montague, and Steve McNeal of the Division of State Health.

The purpose of the meeting was to discuss the permitting requirements for Utah International's proposed relocation of the Iron Springs operation. It was determined that the Division's proposed time schedule was acceptable to Utah International, that of foundations and basic construction approved for immediate startup. Plans for hydrologic design of the dams, dikes for the tailings ponds and water supply pipeline will be submitted at a later date, later this summer, most likely. These facilities will probably be operational within 18 months and will be located on Utah International and CF&L Steel properties.

THOMAS J. SUCHOSKI 
ENGINEERING GEOLOGIST
